CONNECTED MANUFACTURING

FOR

MEDTECH 4.0

CONNECTED MANUFACTURING FOR MEDTECH 4.0

OVERVIEW

OVERVIEW

OVERVIEW

Seabrook enables **Connected Manufacturing** for Medical Device Manufacturers - which increases efficiency, improves throughput, supports compliance and increases profit margin.

Regardless of your manufacturing maturity level, our team of industry-recognized manufacturing solution experts identify opportunities to provide value through our range of services.

Whether you are beginning your journey toward MES implementation, need to upgrade or integrate existing systems or equipment, or implementing a business intelligence strategy, *Seabrook* is the go-to solution provider.

MANY MEDICAL DEVICE MANUFACTURERS ARE STILL OPERATING ON **PAPER**.

Here are the drawbacks:

1

**SIGNIFICANTLY INCREASES
THE RISK OF NON-COMPLIANCE**

2

**IS A BOTTLENECK FOR COMPANIES
EXPERIENCING FAST GROWTH**

3

**REDUCES VISIBILITY IN THE
MANUFACTURING PROCESS**

4

**INCURS STORAGE
AND LABOR COSTS**

Exploring paperless manufacturing is an opportunity for Medical Device Manufacturers to increase their competitive advantages. Stepping into the paperless revolution creates a more secure and more accurate process while leading the way to greater revenues.

Paperless environments see a high level of return on investment (ROI) through:

ELIMINATING PAPER COSTS

**MORE ACCURATE
ORDER PROCESSING**

**REDUCING
NON-CONFORMANCE COSTS**

**IMPROVED
PRODUCTION PERFORMANCE**

WELCOME TO **CONNECTED MANUFACTURING**

Connected Manufacturing brings a fully-integrated approach to medical technologies and manufacturing operations. Connected manufacturing processes are based on industry best practices to power industry-leading operations.

Connected Manufacturing is not just a “product” or “service”, but a strategy that eliminates the shoehorning of new functionality into legacy systems. Additionally, connected manufacturing enables the “best of breed” approach that optimizes operations, enhances user experience, and maximizes value returned to the organization.

Connected Manufacturing helps organizations achieve maximum operational efficiency through intelligence, integration and identification. Our three-part strategy provides integrated technology solutions for medical device and diagnostic manufacturing operations.

Ready to achieve maximum operational efficiency?

Key benefits include:

- ✓ Removal of paper, and the associated pains and costs
- ✓ Increases efficiency by implementing best practices on the manufacturing floor
- ✓ Enforces quality by automating processes and reducing quality head count
- ✓ Captures real-time data, which provides full visibility and traceability on the manufacturing floor

WHY WORK WITH US?

Seabrook brings 32 years of experience in Medical Device manufacturing. We are agnostic - meaning that we consult based on the best solutions for the client. With vast experience in manufacturing, engineering, and IT, Seabrook's industry-recognized team of consultants are experts in Medical Device processes and systems.

Seabrook is proud of our very strong client partner list, from the world's largest and most-recognized Medical Device manufacturers (i.e. Terumo, ThermoFisher, Medtronic, and Cepheid) to SMBs and high-potential start-ups.

With offices in the US, Ireland, Philippines, and India, our global team allows us to provide 24/7 support to our clients.

Our partnerships with Siemens, Tulip, and AWS allows our clients access to proven industry-leading solutions and gives us the flexibility to provide client-centered solutions and support.
