

The 2021 State of Medical Device Product Manufacturing Survey

Is your company prepared for the future of Medical Device production?

We surveyed top executives in the Medical Device industry to determine the 2021 state of Medical Device Product Manufacturing.

50%

of the companies spend between 18-36 months to launch new products

When it comes to developing a product from concept or idea to market-ready, what is your company's average timeline?

What are your strategies to get your product to market quicker than your competitors?

Is your company part of this percentage?

In an ideal world, what would be the maximum amount of time spent on premarket regulatory preparation?

41%

of the companies spend between 6-12 months to prepare a premarket regulatory trail

35%

of the companies spend between 5-8 hours per person to prepare a design or gate review

On top of that, nearly 30% of companies will require more than a day's work, per person.

Imagine getting that average number of hours down to less than five, resulting in more time dedicated to execution.

Which of the following areas are you looking to improve in the next 18 months?
